

dōTERRA® Aroma Ace Nebulizing Diffuser

Congratulations on the purchase of the Aroma Ace Nebulizing Diffuser! This versatile diffuser is easy-to-use, and provides a quiet, powerful diffusion of essential oils and essential oil blends. The revolutionary nebulizing technology uses cool air to atomize a micro-fine essential oil vapor of approximately 1 to 3 microns. A quick-change bottle-top connection makes changing and diffusing oils straight from your essential oil bottles (up to 15 ml sizes) a breeze!

GETTING STARTED

Changing essential oils has never been easier than with the Aroma Ace Nebulizing Diffuser! It takes only seconds to change any oil, anytime.

1. Remove the cap and orifice reducer from your essential oil bottle (or pour your essential oil into one of the provided bottles).
2. Screw the quick-change top onto the bottle.
3. Tilt the bottle assembly slightly to the left so the tabs line up with the slots in the socket on the diffuser base, and insert the assembly into the socket.
4. Rotate the bottle assembly clockwise so it is now in an upright position.
5. Place the diffuser in your desired location and plug it into the wall. Adjust settings as desired

Note: To remove the assembly to change oils, rotate the assembly counter-clockwise and pull it from the socket.

ADVANCED CONTROLS

1. Set the **"ON TIME"** knob for the amount of time you would like your diffuser to run before resting (1 to 20 minutes).
The Green LED light turns on while the diffuser is running.
2. Set the **"OFF TIME"** knob for the amount of time you would like your diffuser to rest before running again (1 to 20 minutes).
The Amber LED light comes on while the diffuser is resting.
3. Set the **"OUTPUT PRESSURE"** knob to the desired level of oil output. Rotating the knob all the way counter-clockwise will click the diffuser over to the "Off" position (turning the diffuser off). Rotating the knob clockwise will turn the diffuser on, then increase the oil output.

CLEANING INSTRUCTIONS

1. Remove the bottle assembly from the diffuser base.
2. Unscrew the bottle from the quick-change top.
3. Submerge the quick-change top in warm, soapy water or rubbing alcohol for 30-60 minutes.
4. Rise with clean warm water.

SAFETY INSTRUCTIONS

- Never submerge the diffuser in water or operate this diffuser with wet hands
- Unplug diffuser when not in use
- Keep away from children and pets
- Do not attempt to make repairs to or service this unit yourself
- Always keep the Aroma Ace Nebulizing Diffuser in an upright position

LIMITED WARRANTY

This product is warranted to be free from defect in materials and workmanship for the period of 90 days from purchase. This warranty does not cover damage due to abuse, misuse, negligence, or accidents by the user, or attempted repair or service by an unauthorized technician.
